

Physicians' Day at the Legislature

Wednesday, May 31, 2017, 8 am to 3 pm

Every other year, osteopathic and allopathic physicians, physician assistants, medical students, and legislators come together at the Maine State Capitol to engage in discussions on important health policy issues including access to affordable, quality healthcare for all Mainers.

We hope you will join your colleagues on Wednesday, May 31, 2017 from 8-3 p.m. Whether you've attended Physicians' Day at the Legislature several times or never, it is important for health professionals to visit with legislative members to represent your profession and your patients outside of the clinical setting.

Decisions made at the State Capitol and in Congress have a major impact on medicine, making it particularly important for health professionals to be engaged in the political process. During Physicians' Day at the Legislature, you will have the opportunity to engage with your legislators, including meetings

with leadership in both the House of Representatives and Senate, and other officials. Participants will have a chance to speak up on issues of significance to health professionals such as health care reform, Medicaid funding, scope of practice issues, state budget priorities, mental health wellness and prevention efforts and more.

An agenda and further details will be made available as we get closer to the event.

Yes I would like to attend!
